ADOPTION OF RULES GOVERNING OPERATION OF "NON-COMMERCIAL EDUCATIONAL" BROADCAST STATIONS

The Commission on January 26, 1938, adopted the following:

RULE 1057. The term "non-commercial educational broadcast station" means a high frequency broadcast station licensed to an organized non-profit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public.

RULE 1058. The operation of, and the service furnished by, non-commercial educational broadcast stations shall be governed by the following regulations in addition to the rules and regulations governing high frequency broadcast stations.

(a) A non-commercial educational broadcast station will be licensed only to an organized non-profit educational agency and upon a showing that the station will be used for the advancement of the agency's educational program.

(b) Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system and may transmit educational and entertainment programs to the general public.

(c) Each station shall furnish a non-profit and non-commercial broadcast service. No sponsored or commercial pro-

gram shall be transmitted nor shall commercial announcements of any character be made. A station shall not transmit the programs of other classes of broadcast stations unless all commercial announcements and commercial references in the continuity are eliminated.

(d) The transmitting equipment, installation, and operation as well as the location of the transmitter shall be in conformity with the requirements of good engineering practice as released from time to time by the Commission.

(e) Any rule or regulation governing high frequency broadcast stations which permits or requires operation different from or in conflict with the provisions of this rule shall not apply to non-educational broadcast stations.

Rule 1059.

(a) The following channels (frequencies) are allotted for assignment to non-commercial educational broadcast stations:

41,020	41,220	41,420	41,620	41,820
41,060	41,260	41,460	41,660	41,860
41,100	41,300	41,500	41,700	41,900
41,140	41,340	41,540	41,740	41,940
41,180	41,380	41,580	41,780	41,980

(b) Stations serving the same area will not be assigned to channels separated less than 160 kc.

(c) Amplitude modulation shall be employed exclusively unless it can be shown that there is a need for frequency modulation in which case such modulation may be authorized provided sufficient channels can be grouped so as to obtain the required band width without causing interference to established stations or preventing the full expansion of the service.

(d) Only one channel (frequency) will be assigned to a station.

(e) Since these channels are not assigned on an experimental basis, the requirements for report on experimental work, as specified for high frequency broadcast stations, do not apply.

GENERAL INSTRUCTIONS

The following general ledger control accounts (indented) are authorized and shall be maintained in each instance where there are transactions of a nature which require their use.

If, however, the volume of transactions in any of these accounts is insufficient to warrant maintenance as a separate general ledger control account, the operator may, with the consent of the Commission, employ the group classification involved as a general ledger control account and the accounts thereunder as subsidiaries, e. g.:

100. Cash

Subsidiary code:

Manual	Machine	
100.01	101	Cash on Deposit—Domestic.
100.06	106	Cash on Deposit—Foreign.
100.11	111	Imprest and Petty Cash Funds.
100.16	116	Cash on Hand and in Transit.

The accounts prescribed in this chart have been coded with a view toward adaptation to machine as well as manual accounting. In instances, therefore, where subsidiary detail accounts are prescribed in the chart, the code numbers assigned thereto should be preceded by a decimal point in manual systems, and by the first numeral of the control account code when used in machine accounting, e. g., under account No. 200—Unterminated Voyage Expense, the classification "Wages" should be coded 200.01 in manual systems and 201 in machine accounting systems.

Except in instances where specific instructions for the maintenance of subsidiary accounts are contained herein, such subsidiary accounts will be maintained when, and in the form and detail, required by the Commission, or the operator, taking into consideration the circumstances with respect to the particular lines or services involved. To this end, supplementary instructions, and such modifications thereof as are dictated by experience, will be issued in each instance.

To insure uniformity in accounting, the operator shall submit all questions of doubtful interpretation of the prescribed accounting to the Commission for consideration and decision.
